

# Automotive Air Conditioning Training

**This course has been developed for qualified automotive technicians, or suitably skilled candidates and is designed to fast track an AAC02 - Refrigerant handling licence if participants have recent qualifications or meet the qualification criteria as set by ARCtick. RTA No. AU02967.**

## Course Outline

All participants of this course need to demonstrate competency in:

- Environmental requirements relating to servicing and repairing of air conditioning and HVAC systems
- Identification and function of major air conditioning and HVAC system components
- Principles of operation of air conditioning and HVAC systems
- Types of air conditioning and HVAC systems
- Service, repair and adjustment procedures of air conditioning and HVAC systems,
- Workplace health and safety (WHS) requirements relating to servicing, diagnosing and repairing air conditioning and HVAC systems
- Handling, storing and transporting refrigerant cylinders and recovery cylinders
- Diagnostic testing procedures for air conditioning and HVAC systems

## Licencing

To attend this course, participants will need to apply for an ARCtick trainee licence (Classroom) CL000.

Upon successful completion of the course, participants will be provided with a statement of attainment listing the completed units. It is the responsibility of the participant to provide their statement of attainment to ARCtick in order to obtain an AAC02 - Refrigerant handling licence.

If you are unsure, contact ARCtick on **1300 884 483** or visit: [arctick.org/refrigerant-handling-licence/licence-types/](http://arctick.org/refrigerant-handling-licence/licence-types/)

## Prerequisites

To enrol in this course, participants must hold one of the recognised qualifications listed on the ARCtick website: [arctick.org/refrigerant-handling-licence/licence-types/](http://arctick.org/refrigerant-handling-licence/licence-types/)

If unsure about eligibility, contact the Australian Refrigeration Council on **1300 88 44 83**

## Delivery Mode

This course is delivered in a flexible, adult-learning environment. Prior to attending the course, all participants are required to complete an online learning module, designed to provide them with the knowledge to be able to successfully complete the practical component.

# Automotive Air Conditioning Training

## Units Covered

Participants that successfully complete the course will be awarded the following units of competency:

AURETU103	AURETU104
Service air conditioning and HVAC systems	Diagnose and repair air conditioning and HVAC systems

## Course Details

The course is delivered over two days.

**Course times:** 8:30 am to 4:30 pm.

**This course is held at:** MTA's Royal Park, Bordertown and Cleve Training Centres or we can accommodate on-site group bookings at your business.

Dates are scheduled throughout the year and are available on our website or when scanning the QR Code below.

## Course Fees

**MTA Members:** \$960 | **Non-members:** \$1,260
